Career

I have been in the biz of show for over twenty-five years, always on the creative and technical front lines. Curiosity took me into film, television, interactive and advertising. Passion brought me to storytelling across multiple mediums. A humble cel painter at Nelvana who became the Graphics Director of CTV National News and then transitioned into VFX and creative design. Director of animated shorts, show opens; leader of many a happy crew. I've recently embraced generative video as new medium. Interests include music, cinema, history, culture, and humans.

Experience

- Creative direction and design
- Lighting, texturing, compositing
- Visual effects (fx, crowd simulation)
- 2D and 3D Animation, stop motion
- Concept design, storyboards
